

# Dr. Scott Lively for Governor of Massachusetts

PO Box 4335, Springfield, MA 01101, [www.LivelyForGovernor.com](http://www.LivelyForGovernor.com), [ScottLively2014@gmail.com](mailto:ScottLively2014@gmail.com)

## AN APPEAL TO PROGRESSIVE VOTERS

**CAN CONSERVATIVES AND PROGRESSIVES SHARE COMMON GROUND?**  
YES, IF OUR PARADIGM IS NATURAL VS. ARTIFICIAL RATHER THAN RIGHT VS. LEFT.

**Lively on the Environment:** *“Concepts such as eco-systems and bio-diversity rest on the same natural law presuppositions as Biblical Christianity: there is an order to nature that works best when protected from artificial substances and disruptions that disrespect the design.”*

**Natural Medicines:** *“Big Phama has enslaved an astonishing 70% of Americans to prescription medications through its control of the medical industry. A lifestyle in harmony with God’s creation avoids most ills and provides real cures for the rest.”*

**Natural Foods:** *“Big Agra has pushed family farms almost to extinction and is feeding us all genetically modified foods while its lobbyists and lawyers fight every effort to warn consumers through product labeling. I would label and tax GMOs.”*

**Natural Persons:** *“I applaud Ralph Nader for his latest book ‘Unstoppable: the Emerging Left-Right Alliance to Dismantle the Corporate State’... These predatory corporations are artificial persons (a legal fiction that has some utility in the business world but causes problems when corporations compete with or control natural persons). Corporate culture must be reformed and corporate predators shut down.”*

**Natural Families:** *“The natural family is the eco-system of humanity. Messing with the design and function of the family is as dangerous to humans as cutting down the rainforests or pouring toxins into the rivers is to wildlife. This is not a religious vs. secular issue. Even Aristotle, originator of ‘the scientific method,’ taught it as a fundamental tenet of his central, guiding philosophy, Teleology.”*

**Natural Communities:** *“Our violence-plagued, ultra-dense city environments designed by United Nations Agenda 21 social engineers are artificial communities...Let’s bring back the era of light-manufacturing-supported New England towns in symbiosis with surrounding agrarian farm communities.”*

### How a Conservative/Progressive Alliance Can Save the Commonwealth:

*“We will all enjoy greater health, stability and prosperity if conservatives and progressives work together to restore the natural order. Conservatives must stop defending predatory corporations in their pro-business arguments and Progressives must stop trying to mainstream same-sex unions and abortion. If we could achieve harmony across the political spectrum among grassroots activists (e.g. Tea Party and Occupy) our combined power to dethrone the elites would be formidable.”*

**VOTE DR. SCOTT LIVELY FOR GOVERNOR OF MASSACHUSETTS**  
**Working to Promote Conservative/Progressive Cooperation for the Good of All!**

PS. LET’S ALSO SAVE THE HONEY BEES!!!

Pictured here in 2012 on his annual 100-mile hike on the Appalachian Trail, Scott is an avid naturalist in the mode of Teddy Roosevelt, a founder of the Progressive Movement.

In his first career in Oregon, Scott founded and ran Portland Handyman, a collective of independent building trades contractors, and has always been a champion of co-ops and profit sharing business models such as the Spanish co-op Mondragon, Spain’s eight largest company (founded by a Catholic monk), in which top executives earn no more than 5 times the income of the lowest wage-earners in the sharing of profits. Lively is presently designing a co-op model for inner-city Springfield to help liberate poor families from government dependency.
